Prima di ordinare/realizzare la porta per il controtelaio Essential Dual è necessario verificare in cantiere l'effettiva misura della luce di passaggio. Essa si rileva ad installazione avvenuta del controtelaio.

Before ordering the door for the Essential Dual frame, the effective clear opening size must be checked onsite. This must be measured after the installation of the frame.

La luce di passaggio effettiva a porta installata è ridotta in larghezza di 140 mm.
The effective clear opening size with the door installed is reduced in width by 140 mm.

Le particolari caratteristiche del controtelaio Essential Dual rendono indispensabile l'abbinamento o con la sua porta vetro finita, oppure con la sua specifica ferramenta.

The special characteristics of the Essential Dual frame make it essential for it to be combined with the finished glass door or its specific hardware fittings.

Lavorazione per maniglia a scomparsa
Machining for concealed handle

Senza lavorazione maniglia
Without machining for handle

Lavorazione per coppia maniglie
Machining for pair of handles

Lavorazione per distanziatore per scomparsa parziale dell'anta
Machining for spacer for partial panel concealment

Vetri temperati spessore 10 mm.

Vetri completi delle lavorazioni per il montaggio della ferramenta specifica (pinze e trascinatori) ed eventuale lavorazione per maniglia.

Con la scelta "senza lavorazione maniglia" o "lavorazione per coppia maniglia" la luce di passaggio effettiva a porta installata è ridotta di circa 100 mm ed è indispensabile l'utilizzo del distanziatore per scomparsa parziale anta.

Prima di ordinare i vetri è necessario verificare in cantiere l'effettiva misura della luce di passaggio che si rileva ad installazione avvenuta del controtelaio.

Tempered glass thickness 10 mm.

Glass panels complete with machining for installation of the specific hardware fittings (clamps and sliders) and for handle if necessary.

On the "without machining for handle" and "machining for pair of handles" versions, the effective clear opening size is reduced by 100 mm, and the spacer for partial panel concealment must be used.

Before ordering glass panels, the effective opening dimension must be checked directly on site, which must be measured after frame installation.

FERRAMENTA VETRI MONTAGGIO SINISTRO / GLASS HARDWARE FOR LEFT-HAND FITTING

Kit trascinatori per montaggio Sinistro / Slider kit for left-hand fitting

Dotazione:

- n° 1 Kit di trascinamento 3 ante per ante in vetro (montaggio sinistro)
- n° 6 Pinze 170 Cover
- n° 6 Carrelli con viti M8 x 35
- n° 3 Fermi di battuta

Finitura pinze e trascinatori: alluminio simil inox
Kit adatti a vetri temperati spessore 10 mm.

Accessories:

- n° 1 slider kit for 3 glass door panels (left-hand fitting)
- n° 6 clamps 170 Cover
- n° 6 hangers with M8 x 35 screws
- n° 3 endstops

Clamp and slider finish: stainless-steel effect aluminium.
Kits suitable for tempered glass thickness 10 mm.

FERRAMENTA VETRI MONTAGGIO DESTRO / GLASS HARDWARE FOR RIGHT-HAND FITTING

Kit trascinatori per montaggio Destro / Slider kit for right-hand fitting

simil acciaio satinato
Concealed handle without lock
with satin-finish steel effect

> ESSENTIAL PRO

Essential Pro è una particolare versione di Essential scorrevole, che permette l'installazione del kit Scrigno Open per l'automazione della porta scorrevole. Scrigno Open è un dispositivo molto semplice da installare; il gruppo motore, di dimensioni ridotte, è fissato alla guida del contro telaio e si cela totalmente, mantenendo inalterata l'estetica della porta, riducendo la luce di passaggio.

Essential Pro is a special version of the sliding Essential frame, permitting the installation of the Scrigno Open Kit for the automation of the sliding door. Scrigno Open is an extremely easy device to install. The compact motor unit is fixed to the track of the frame and is totally concealed, ensuring that the attractiveness of the door remains unimpaired, reducing the effective clear opening size in width.

INTONACO / PLASTERED

The effective clear opening size is reduced in width by 10 mm for the single door.

Essential Pro per cartongesso consente l'installazione di un pannello porta con spessore massimo 40 mm.
I profili in alluminio che delimitano la luce di passaggio, sia in larghezza sia in altezza, per la parete finita 100 mm, hanno uno spessore pari a 105 mm e devono essere raccordati alla parete mediante rasatura.

Dotazione di serie:

- carrelli portata kg 120 per anta
- battuta anteriore in alluminio grezzo da tinteggiare
- guarnizione e spazzolini parapolvere

I controtelai per cartongesso sono predisposti per lastre dello spessore di 12,5 mm per lato.

Essential Pro for plasterboard allows a door panel with a maximum thickness of 40 mm to be installed.
The profile bars around the top and sides of the door opening, for a finished wall thickness of 100 mm, have a thickness of 105 mm, and the gaps must be smoothed with finishing plaster.

Standard accessories:

- hangers with a capacity of 120 kg for every panel
- front upright in unfinished aluminium to be painted
- sealing strip and anti-dust brushes

Sliding door frames for plasterboard are designed for plasterboard panels with a thickness of 12.5 mm on each side.

>ESSENTIAL ACQUA - VETRI *GLASSES PANELS*

VETRO TEMPERATO TRASPARENTE E SATINATO / CLEAR AND FROSTED TEMPERED GLASS

Il vetro temperato viene ottenuto per indurimento tramite trattamento termico che lo riscalda alla temperatura di tempra di 650 °C e successivamente posto a raffreddamento controllato.
Con questo processo il vetro acquista una resistenza meccanica cinque volte più resistente di un comune vetro. Conformi alle norme UNI EN 12150, UNI 7697 e UNI EN 12600.
In caso di rottura si sbriciola in piccoli frammenti inoffensivi.
Le operazioni di pulizia e manutenzione possono venir effettuate con estrema semplicità.

Spessore vetro: 5 mm.

La satinatura di questo tipo di vetro viene fatta solo su 1 lato.

Tempered glass is hardened by heat treatment, in a process that heats it to the tempering temperature of 650°C, followed by controlled cooling.

This process gives the glass a level of mechanical resistance five times greater than that of untreated glass.

Compliant with the UNI EN 12150, UNI 7697 and UNI EN 12600 standards.

In case of breakage, the glass shatters into small and harmless fragments.

Cleaning and maintenance operations can be carried out with great simplicity.

Glass thickness: 5 mm.

This type of glass is frosted on one side only.

VETRO STRATIFICATO / LAMINATED GLASS

Vetro stratificato composto da due lastre di vetro (1) con interposta una pellicola di materiale plastico PVB (2) trasparente, che aderisce perfettamente alle due superfici di vetro, creando così un'unica lastra.
Conformi alle norme UNI 7697 e UNI EN 12600.

In caso di rottura la pellicola interna permette di trattenere i vari frammenti.

Le operazioni di pulizia e manutenzione possono venir effettuate con estrema semplicità.

Spessore vetro: 6 mm.

Laminated panel composed of two panes of glass (1) with a layer of transparent PVB plastic (2) between them, adhering perfectly to the two glass surfaces to create a single panel.

Compliant with the UNI 7697 and UNI EN 12600 standards.

In case of breakage, the internal film retains the fragments of glass.

Cleaning and maintenance operations can be carried out with great simplicity.

Glass thickness: 6 mm.

Dalla sinergia tra Scrigno e Faac, azienda leader nelle automazioni in ambito residenziale e industriale, nasce OPEN, il nuovo dispositivo in kit che consente di rendere automatica l'apertura e la chiusura di una porta scorrevole a scomparsa.

Sviluppato esclusivamente per il controtelaio ESSENTIAL PRO, è un kit di semplice installazione e può essere applicato anche su porte scorrevoli a scomparsa già in opera, senza ulteriori lavori di muratura.

Di dimensioni contenute, il gruppo motore è fissato alla guida del controtelaio e si cela totalmente mantenendo inalterata l'estetica della porta.

OPEN is a device that makes it possible to automatically open and close a sliding disappearing door mounted on an ESSENTIAL PRO frame.

Available in kit form, it is easy to fit, even in the case of sliding disappearing doors already installed.

The compact motor unit is fixed to the track at the top of the frame and is totally concealed, leaving the external appearance of the door unchanged.

DOTAZIONE

- 1) 1 gruppo motore
- 2) 1 cavo alimentazione/comando (1 mt.)
- 3) 1 cavo messa terra (1 mt.)
- 4) 1 cassetta 150x110x70
- 5) 1 ricevitore + n° 2 trasmettitori
- 6) 6 viti autofilettanti $\varnothing$ 4.2x13
- 7) 2 clip di fissaggio
- 8) 1 vite autofilettante $\varnothing$ 2.9x13
- 9) 2 viti da legno 5 x 20
- 10) 1 trasformatore
- 11) 1 interruttore
- 12) 5 giunti termoretrattile
- 13) 6 rivetti

OPTIONAL: radar

COMPONENTS

- 1) 1 motor unit
- 2) 1 power supply/command cable
- 3) 1 grounding cable
- 4) 1 box 150x110x70
- 5) 1 receiver + 2 transmitters
- 6) 6 self-tapping screws $\varnothing$ 4.2x13
- 7) 2 fixing clips
- 8) 1 self-tapping screw $\varnothing$ 2.9x13
- 9) 2 wood screws 5 x 20
- 10) 1 transformer
- 11) 1 switch
- 12) 5 heat-shrink joints
- 13) 6 rivets

OPTIONAL: radar

ESEMPIO INSTALLAZIONE SU ESISTENTE / EXAMPLE OF INSTALLATION ON EXISTING FRAME

ESEMPIO INSTALLAZIONE SUL NUOVO / EXAMPLE OF INSTALLATION ON NEW FRAME

- L'installazione del Kit Open riduce la luce di passaggio in larghezza di circa 80 mm
The installation of the Open kit reduces the passage opening in width of 80 mm approximately.
- Il kit permette l'automazione di porte con peso massimo di 40 Kg - *The kit allows the automation of doors for a maximum weight of 40 Kg.*

Il punto luce adesivo, facile da applicare ed economico che si adatta al tuo impianto rispettandone l'estetica.
The self-adhesive light switch, cheap and easy to fit without building work, and a perfect décor match.

Scrigno Switch è l'interruttore in radiofrequenza per comandare l'accensione e/o lo spegnimento di un nuovo punto luce. È la soluzione ideale in tutte quelle situazioni dove non è possibile installare un impianto cablo tradizionale per via della mancanza di spazio nella parete, come ad esempio in presenza di controtelai. La praticità, l'estetica e la facilità d'installazione consentono di utilizzare Scrigno Switch anche in quei casi in cui si ha l'esigenza di creare una nuova accensione in ambienti non opportunamente cablati in fase di costruzione, senza che siano necessari lavori di muratura e passaggio di cavi.

Scrigno Switch is a radiofrequency switch that can be used to turn a light on and off, and is the ideal solution in all situations where a conventional wiring system cannot be installed due to lack of sufficient depth of the wall, as for instance in the presence of a built-in frame for a sliding disappearing door. Practical, unobtrusive and simple to install, Scrigno Switch can also be used in other spaces where a new light switch is required but that are without suitable wiring, with no need for building work and the installation of power cables.

VANTAGGI / ADVANTAGES

- Facile da installare;
- perfetta armonizzazione estetica con gli impianti già presenti nell'abitazione attraverso l'utilizzo del kit di adattatori;
- utilizzo di batterie a bottone al litio a lunga durata;
- Conforme a:
 - Direttiva 89/336/CEE relativa alla compatibilità elettromagnetica.
 - Direttiva 73/23/CEE relativa alle apparecchiature elettriche in bassa tensione.
 - Direttiva 1999/5/CE riguardante le apparecchiature radio e le apparecchiature terminali di telecomunicazione e il reciproco riconoscimento della loro conformità.

- Easy to install;
- styling and colour to perfectly match existing switch and socket fittings with use of the adaptor kit;
- powered by long-life lithium button batteries;
- In accordance with:
 - Directive 89/336/EEC (ECM Directives) and subsequent amendments concerning Electromagnetic Compatibility.
 - Directive 73/23/EEC concerning Low Voltage Equipment
 - Directive 99/5/EC in accordance with the Radio & Telecommunication Terminal Equipment and the mutual recognition of their conformity.

Spingere Sx / Push Left

Spingere Dx / Push Right

Funzionamento	 Porta a filo parete con gioco fra pannello e telaio di circa 3 mm. Rotazione su cerniere a scomparsa. Massima apertura 90°.	
Dimensioni disponibili	 • Larghezza da 600 a 1100* mm. • Altezza: tutte le misure da 2000 a 2650 mm. * Per la larghezza da 1100 mm, l'altezza massima è 2530 mm.	
Tipologia apertura	 Modello Sinistro a Spingere  Modello Destro a Spingere L'apertura a spingere consente l'apertura dell'anta a 90°, questo riduce la luce di passaggio di circa 60 mm.	
Classe di resistenza al fuoco	• REI30 _ EI1 30' • REI60 _ EI1 60'	
Certificazioni	Certificata secondo UNI EN 1634-1:2009 ed omologata come da D.M. 21/06/2004: • istanza di omologazione RN284EI1060P001(Rei 60) • certificato di prova di resistenza al fuoco N° 52/U/12-164FR.	Abbattimento acustico: Rw 23(-1:0) dB secondo ISO 717-1(2000). Risultato ottenuto con chiudiporta incassato Dorma e guarnizione sottoporta.
Finiture Pannello	• Con fondo (primer)	
Spessore parete	Parete finita: • 125 mm o superiore in muratura • 125 mm o superiore in cartongesso	
Pannello	Spessore 60 mm composto da telaio in legno duro e materiale termoisolante, placcato con mdf da 3 mm con guarnizione perimetrale di battuta. Pannello predisposto con foro maniglia e cilindro.	
Guarnizioni	• In pvc di colore nero o bianco per la tenuta dell'aria • Termoespandenti di colore nero o bianco per la tenuta dei fumi caldi Optional: • Guarnizione sottoporta (paraspifferi)	
Rostrì per porte tagliafuoco	n° 3 rostro passivo SC-Firebolt in Fe zincato n° 3 rostro attivo SC-Firebolt in Fe zincato	
Cerniere	n°5 Cerniere a scomparsa registrabili sui 3 assi, verniciate argento. Registrazioni consentite: • Regolazione verticale ± 2 mm • Regolazione in pressione ± 1 mm • Regolazione orizzontale $\pm 1,5$ mm	

Chiudiporta	Incassato Dorma ITS 96 EN 2-4. Chiudiporta con azionamento a camma integrato nel pannello porta, marcato CE secondo la normativa EN 1154 A, con coppia di apertura/forza a decremento rapido. Forza di chiusura, velocità di chiusura e azione di scatto regolabili. 
Tipologia chiusura	 Serratura: A. Serratura Sicurezza E70 F22 B. Opera SL E70 F22 (senza antieffrazione) C. Opera DQ SL E70 F22
Finiture serrature e incontro elettrico	• Cromo opaco
Descrizione funzionamento serrature	Sicurezza SL entrata 70 frontale 22. Serratura tradizionale con scrocco e catenaccio azionato da cilindro a profilo Din V 18254. Lo scrocco a leva assicura il massimo silenzio nella chiusura della porta, specialmente quando è installato un chiudiporta automatico. La serratura è marcata CE secondo la normativa EN 12209:2003/AC:2005 ed è quindi certificata per l'utilizzo su porte tagliafuoco e tagliafumo. Non è possibile installare le maniglie con viti passanti.
	Opera Hotel SL entrata 70 frontale 22 senza antieffrazione. Serratura antipanico per porte di Hotel e comunità. Dall'interno, abbassando la maniglia, si sbloccano istantaneamente scrocco e catenaccio consentendo l'uscita rapida dalla stanza in caso di emergenza. La serratura OPERA SL permette di utilizzare qualunque tipo di maniglia. Il segnalatore di presenza, infatti, è collocato direttamente sul cilindro. Da abbinare esclusivamente a Cilindro OPERA con rotazione limitata. Con l'utilizzo di incontri elettici, è possibile automatizzare l'apertura della porta per mezzo di badge e transponder. La serratura è marcata CE secondo la normativa EN 12209:2003/AC:2005 ed è quindi certificata per l'utilizzo su porte tagliafumo e tagliafuoco.
	Opera hotel DQ SL entrata 70 frontale 22 (serratura con un solo lato antipanico). Serratura da infilare antipanico per porte di Hotel e comunità (centri di cura, di accoglienza per anziani e di villeggiatura, bagni, accessi comuni in edifici pubblici, per le quali sia utile o necessario l'utilizzo della maniglia da ambo i lati della porta). Dall'interno, abbassando la maniglia, si sbloccano istantaneamente scrocco e catenaccio consentendo l'uscita rapida dalla stanza in caso di emergenza. Abbassando la maniglia dal lato antipanico, catenaccio e scrocco rientrano nella serratura; dal lato opposto, l'abbassamento della maniglia determina il rientro solamente dello scrocco. Da abbinare esclusivamente a Cilindro OPERA a rotazione completa. Con l'utilizzo di appositi incontri elettici, è possibile automatizzare l'apertura della porta per mezzo di badge e transponder. La serratura è marcata CE secondo la normativa EN 12209:2003/AC:2005 ed è quindi certificata per l'utilizzo su porte tagliafumo e tagliafuoco.
Incontro su telaio (valido per serrature sicurezza e Opera)	Descrizione Incontro con vaschetta regolabile (elettrificabile in un secondo momento). Utilizzo Su serrature antipanico Opera e sicurezza SL si ha un incontro normale che può diventare in secondo momento incontro elettrico sostituendo la vaschetta con un blocchetto. Non abbinabile con serratura Opera con antieffrazione.
Blocchetto elettrico	Blocchetto elettrico 12V. Ca 250/cc280mA, 24V ca 500/cc560mA senza memoria di apertura, senza leva sblocco manuale.
Composizione imballo	Composto da due colli: • collo telaio • collo anta Tutti gli accessori, cerniere, guarnizioni, chiudiporta, Firebolt e serratura sono forniti all'interno del collo telaio e sono da installare in fase di montaggio porta.

Operation	 Door flush with the wall with a play of about 3 mm between the door panel and the frame. Rotation on concealed hinges. Maximum opening 90°.	
Available sizes	 • Width from 600 to 1100 mm.* • Height: all sizes from 2000 to 2650 mm. * For the width of 1100 mm, the maximum height is 2530 mm.	
Opening types	  Modello Sinistro a Spingere Modello Destro a Spingere Push opening allows doors to be opened to 90°, but this reduces the clear opening size by about 60 mm.	
Fire resistance class	• REI30 _ EI1 30' • REI60 _ EI1 60'	
Certifications	Certified in accordance with UNI EN 1634-1:2009 and type-approved pursuant to Ministerial Decree 21/06/2004: • type-approval request RN284EI1060P001(REI 60) • fire resistance test certificate No. 52/U/12-164FR.	Noise insulation: Rw 23(-1;0) dB in accordance with ISO 717-1(2000). Result obtained with incorporated Dorma door closer and bottom draught excluder.
Door panel finish	• Primer coat	
Wall thickness	Finished wall: • 125 mm or more with plasterwork • 125 mm or more with plasterboard	
Door panel	Thickness 60 mm, composed of a hardwood frame and heat insulation material, faced with 3 mm MDF with edging seals on closures. Door panel pre-fitted with hole for handle and lock cylinder.	
Seals	• In black or white PVC for sealing against draughts • Black or white intumescent strips for sealing against hot fumes Optional accessories: • Bottom seal (draught excluder)	
Bolts for fire doors	3 passive SC-Firebolts in galvanized steel 3 active SC-Firebolts in galvanized steel	
Hinges	5 concealed hinges adjustable on 3 axes, painted silver. Possible adjustments: • Vertical adjustment ± 2 mm • Pressure adjustment ± 1 mm • Horizontal adjustment ± 1.5 mm	

Door closer	Incorporated Dorma ITS 96 EN 2-4. Door closer with cam operation incorporated into the door, CE-marked in compliance with the EN 1154 A standard, with rapid opening/force torque decrease. Variable closing force, closing speed and latching action. 
Closure type	 Lock: A. E70 F22 safety lock B. Opera SL E70 F22 (without anti-intrusion protection) C. Opera DQ SL E70 F22
Lock and electric strike plate finish	• Mat chrome
Lock operation descriptions	SL safety lock, backset 70 mm, faceplate 22 mm. Conventional lock with latch and bolt operated by a cylinder with a DIN V 18254 profile. The lever latch ensures the maximum silence of door closure, particularly when an automatic door closer is also fitted. The lock is CE-marked in compliance with the EN 12209:2003/AC:2005 standard, and is therefore certified for use on smoke and fire doors. Handles with through screws cannot be fitted.
	Opera Hotel SL, backset 70 mm, faceplate 22 mm, without anti-intrusion protection. Panic lock for hotel and community doors. When the handle is lowered from the inside, the latch and lock are immediately released, allowing a rapid exit to be made from the room in case of an emergency. The OPERA SL lock allows any type of handle to be used. The occupancy indicator is in fact linked directly to the cylinder. Can be used only with an OPERA cylinder with limited rotation. When an electric strike plate is fitted, door opening can be automated using a badge and transponder. The lock is CE-marked in compliance with the EN 12209:2003/AC:2005 standard, and is therefore certified for use on smoke and fire doors.
	Opera hotel DQ SL, backset 70 mm, faceplate 22 mm (lock with only one panic side). Insertable panic lock hotel and community doors (healthcare centres, hospitality structures for the elderly and holidaymakers, bathrooms, common entrances in public buildings, where use of the handle from both sides of the door is preferred or necessary). When the handle is lowered from the inside, the latch and lock are immediately released, allowing a rapid exit to be made from the room in case of an emergency. When the handle is lowered on the panic side, the latch and bolt retract into the lock. From the opposite side, lowering the handle retracts only the latch. To be used only with an OPERA cylinder with complete rotation. When the specific electric strike plate is fitted, door opening can be automated using a badge and transponder. The lock is CE-marked in compliance with the EN 12209:2003/AC:2005 standard, and is therefore certified for use on smoke and fire doors.
Strike plate on frame (valid for safety locks and Opera locks)	Lock Strike plate with adjustable recess (can be electrified subsequently). Use Opera panic locks and SL safety locks are fitted with a normal strike plate that can later be converted into an electric strike plate by replacing the recess with an electrical unit. Cannot be combined with Opera locks with anti-intrusion protection.
Electrical unit	Electrical unit 12V. 250 V AC/ DC 280 mA, 24 V AC 500 V/ DC 560 mA, without opening memory, without manual release lever.
Packaging composition	Composed of two packages: • frame package • door panel package All accessories, including hinges, seals, door closer, Firebolts and lock, are supplied inside the frame package, and must be fitted when the door is installed.
